JackJaw® Post Extractors

JackJaw® Extractors make an easy task of pulling stakes and posts driven in soil. JackJaws can not be used for removing post embedded in concrete - soil installations only. With a couple pumps of the handle, stakes and posts break loose. The jaw and lever mechanism allow you to pull stakes and posts straight up out of the ground without bending them, preserving the posts and stakes for hundreds of repeated uses.

Surface Mount Tubular Marker

In accordance with MUTCD Tubular Markers versus Tube Delineators

Delineator: a retroreflective device mounted on the roadway surface or at the side of the roadway in a series to indicate the alignment of the roadway, especially at night or in adverse weather.

Tubular Markers may be effectively used for emphasis of pavement marking patterns including • opposing lane dividers of traffic • dividing traffic when two or more lanes are kept open in the same direction • channelizing traffic in exit only applications • urban turn restrictions • indicating changes of alignment in the roadway • delineating edge of pavement drop off where space limitations do not allow the use of larger systems.

◆ Shall be made of a material that can be struck without causing vehicle damage.

◆ Day and low speed roadways (40 MPH or less). Requirements: 18" minimum height with at least (1) one 3" retro-reflective stripe.

◆ Night and high speed roadways (45 MPH or higher) Requirements: 28" minimum height with (2) two retro-reflective stripes that are between 2" - 3" wide.

◆ Channelizer Stripes shall begin 2" from the top and have 2" - 6" between stripes

◆ Marker Tube Diameter shall be a minimum of 2" with 2" - 3" outside diameters being the most common.

◆ Tubular Markers shall have permanently affixed bases or have weighted portable bases.

◆ Lane separators shall be crashworthy.

◆ In TTC work zones, Tubular Markers should only be used where space restrictions do not allow more visible devices.

Helpful Hint:

◆ White Reflective Sheeting separates same direction traffic flow or supplements right edge white lines.

◆ Yellow Reflective Sheeting separates opposite direction traffic flow or supplements left edge yellow lines.
