

# Brite-Max Reflectors

Cost Effective • For Traffic Signs • MUTCD APPROVED

## Brite Max Post Reflectors

**Enhance safety by making signs more visible with the Brite-Max Post Reflector System!**

- ◆ Each reflector is 30" long and may be stacked for more effectiveness.
- ◆ Fasten to U-Channel, square, or wood posts.
- ◆ **3M™** reflective sheeting on .080" Aluminum
- ◆ Mounting hardware is available, sold separately.
- ◆ *Other lengths available. Call for quote.*

3M™ Reflective Sheeting		Colors (XX)
(E) Engineer Grade	BA080E(XX)0330BM	(RE) Red
(H) High Intensity	BA080H(XX)0330BM	(YE) Yellow
(D) VIP Diamond Grade™	BA080D(XX)0330BM	(WH) White
(D) Fluorescent VIP Diamond Grade™	BA080D(XX)0330BM	(FG) Fluorescent Green (FY) Fluorescent Yellow

## MUTCD Guidance

### Post Reflectors to Enhance Visibility of Signs:

Where engineering judgment indicates a need to draw attention to the sign during nighttime conditions, a strip of retroreflective material may be used on regulatory and warning sign supports.

**A White Retroreflective Strip** not less than 2 inches in width shall be used on the back of each Crossbuck sign, unless installed back-to-back or on one way street. See MUTCD for more information.

**2 HIP White Retroreflective Strips - S4802STRIPHI**
